DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-12 and 14-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. 6,063,844 (Barren et al) as per reasons of record.

Response to Arguments

3. Applicant's arguments filed July 13, 2005 have been fully considered but they are not persuasive.

It is maintained that the rubber modified graft copolymer of Barren et al includes ASA type resins prepared with structural units in the rigid phase derived from at least one alkyl(meth)acrylate monomer. The reference expressly teaches that the rigid phase can be derived from one or more monomers selected from alkyl (meth)acrylates, vinyl aromatics and unsaturated nitriles (column 7, lines 34-38). Accordingly, it would have been obvious to one having ordinary skill in the art to have used a rubber modified graft copolymer containing a rigid phase derived (meth)acrylate monomers in addition to the exemplified styrene and acrylonitrile monomers with the reasonable expectation of success since only its additive effect would have been expected. Absent evidence of unusual or unexpected results, no patentability can be seen in the presently claimed subject matter. Applicants' comparative data in the specification does not appear to be based on fixed variables and, as such, its probative value as a showing of

Art Unit: 1711

unexpected results relative to the presently claimed structural units in the rigid phase derived from at least one alkyl(meth)acrylate monomer is questioned.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
